Post-Seminar Summary

Meeting 1

Things that worked
- Topics covered
- The discussion at the beginning about the first week was very productive
- The material was concise, there were a number of good questions asked as well
- Combining grading and writing exams worked very well.
- Tim and I did a good job of keeping the discussion on track when we were discussing the homework problems.

Things that didn't work
- Needed more discussion at the end, material was not broken up very well.
- Because of the similarities in subject content, the material the end felt somewhat redundant, having a "what do you think makes a good exam" portion at the end would have been more appropriate.
