

Syllabus—Math 401, Fall 2018

Advanced Calculus I

INSTRUCTOR: Matthew Blair

EMAIL: blair@math.unm.edu

OFFICE: SMLC 330

MEETING TIMES/LOCATION: Monday, Wednesday, and Friday 10-10:50am in DSH 136.

RECITATION: Tuesdays at 3:30-4:45pm in DSH 136.

RECITATION LEADER: Cairn Overturf (Email: covert01@unm.edu).

COURSE WEBSITE: www.math.unm.edu/~blair/math401f18.html

OFFICE HOURS (BLAIR): 2-3:30pm Mondays and 1-2:30pm Tuesdays. Also by appointment.

OFFICE HOURS (OVERTURF): 4:45-5:45pm Tuesdays. Consult the TA for further availability.

PREREQUISITES: 264 and two MATH courses 300-level or above.

COURSE CREDITS: 4 credit hours.

TEXTS:

1. *Elementary Analysis*, Second Edition, by Kenneth A. Ross. Published by Springer.
2. *Book of Proof*, Second Edition, by Richard Hammack. Self-published. A free and legal PDF of the text is available at www.people.vcu.edu/~rhammack/BookOfProof/

Course Description

From the Catalog: *Rigorous treatment of calculus in one variable. Definition and topology of real numbers, sequences, limits, functions, continuity, differentiation and integration. Students will learn how to read, understand and construct mathematical proofs.* The goal will be to cover Chapters 1, 2, 4-10, 12 in the Hammack text and most of the Ross text, excluding only a few of the starred sections.

Grading Scheme

Homework: 25%, Midterm exams: 45%, Final exam: 30%. Requests to change grading modes to Audit or Credit/No-Credit will be considered, but these requests should be fully processed before December 7, the last day of class.

Exams

There will be in-class midterms on Wednesday, September 26, and Friday, November 9. The final exam is Friday, December 14, 7:30-9:30am, in our usual class room. Information regarding the content of the exams will be provided in class as the time approaches. If you must miss an exam for a **valid** and **documented** reason such as illness, family emergency, active participation in scholarly or athletic activities, then you should notify the instructor as soon as possible. Otherwise, registration for the course constitutes an agreement that you will make every possible effort to be present for the exams.

Homework

Homework will be assigned on a weekly basis, typically collected on Wednesdays, with possible exceptions on exam weeks and holidays. Assignments will be handed out in class and posted on the course website. Other important considerations and policies for homework are below.

- **If you are stuck on a problem, get help in office hours.** This is what office hours are for! Be prepared to have a discussion concerning the progress you have made on the problem.
- **Each assignment must be written up on your own and in your own words.** You may discuss homework problems with others, but your own understanding of the solution must be evident in your written work. **Assignments that are excessively unoriginal will not go unnoticed.** No collaboration is permitted on the exams.
- **Policy on responsible internet use.** You may use the internet as well as other texts to supplement your reading and enhance your understanding of the material. **However, you may not consult solutions written by others for the purpose of preparing a graded homework set.** This includes solutions manuals for the text and solutions found or solicited on internet forums. Such practices will be treated as a violation of the student code of conduct and is counterproductive towards your learning.
- **When writing a proof, limit yourself to theorems and definitions from the textbook and class.** Much of the homework is designed to see what can be solved using only the basic principles introduced to that point. Appealing to theorems from outside these two resources defeats this purpose and does not reflect your comprehension.
- **Late homework is not accepted.** Homework is expected to be submitted during class on the day it is due. However, the two lowest homework scores will be dropped at the end of the semester.
- **Presentation matters.** Your homework will be graded on the clarity and cogency of your mathematical reasoning. Take care to hand in a neat, legible assignment and staple the pages together in the upper left hand corner. Provide enough room for comments and other marks in the margins. Assignments not in compliance are subject to point deductions. The instructor does not supply a stapler for homework sets.
- **Hand in a *hard copy* of the assignment at the beginning of class.** Electronically submitted work is not accepted unless prior arrangements are made with and agreed to by the instructor.
- **You are expected to read the textbook outside of class.** Reading sections in the book before they are discussed in class will help you to get the most out of class time and to stay on top of the material.
- **Don't neglect the "On your own" problems.** You will often be given homework problems which you are to do on your own, i.e. it will not be collected for a grade. These are typically assigned as problems of significance to think about without overloading an assignment with too many written problems.

Attendance and participation

The student handbook states “students are expected to attend all meetings of the classes in which they are enrolled.” This includes recitations. Be ready to engage yourself each lecture or recitation. Attendance will be taken regularly over the first two weeks at the very minimum. Students not meeting expectations on attendance will be dropped from the course. Absences should be rare and warranted. If circumstances are causing you to miss a substantial amount of class, you should contact the instructor as soon as possible.

You are expected to arrive to class on time. Class will start promptly at 10am. Being punctual is important so that we may conduct important business at the start of each class period and so as not to disrupt the instructor or your classmates.

The use of phones, laptops, and tablets are limited to note taking: no extracurricular use is permitted during class time. If an emergency requires you to answer a call or text a message handle this outside of the classroom. Phones should be silenced during class time.

Recitation

The weekly recitations are an essential part of the course, and vital to student success. The purpose of these sections is to discuss material related to the lectures and go over additional examples. You will also have an opportunity to discuss homework problems.

Email

On occasion, important announcements may be communicated through email. It is your responsibility to ensure that you either check the email account on file with University regularly or have these messages forwarded to an account which you do check regularly.

Email is a good way to communicate with the instructor during the working day, but please do use good email etiquette, including the use of greetings and topical subject headings. These are important to organize messages and distinguish your message from spam. Given the sophistication of the subject, mathematical questions cannot always be answered over email, particularly if there are several questions or if the answer is involved.

Academic Integrity

Each student is expected to maintain the highest standards of honesty and integrity in academic and professional matters. The University reserves the right to take disciplinary action, up to and including dismissal, against any student who is found guilty of academic dishonesty or otherwise fails to meet the standards. Any student judged to have engaged in academic dishonesty in course work may receive a reduced or failing grade for the work in question and/or for the course.

Academic dishonesty includes, but is not limited to, dishonesty in quizzes, tests, or assignments; claiming credit for work not done or done by others; hindering the academic work of other students; misrepresenting academic or professional qualifications within or without the University; and

nondisclosure or misrepresentation in filling out applications or other University records.

Title IX Statement

In an effort to meet obligations under Title IX, UNM faculty, Teaching Assistants, and Graduate Assistants are considered “responsible employees” by the Department of Education (see pg. 15 www2.ed.gov/about/offices/list/ocr/docs/qa-201404-title-ix.pdf). This designation requires that any report of gender discrimination which includes sexual harassment, sexual misconduct and sexual violence made to a faculty member, TA, or GA must be reported to the Title IX Coordinator at the Office of Equal Opportunity (oeo.unm.edu). For more information on the campus policy regarding sexual misconduct, see: policy.unm.edu/university-policies/2000/2740.html

Accommodation Statement

In accordance with University Policy 2310 and the Americans with Disabilities Act (ADA), academic accommodations may be made for any student who notifies the instructor of the need for an accommodation. It is imperative that you take the initiative to bring such needs to the instructors attention, as he/she are not legally permitted to inquire. Students who may require assistance in emergency evacuations should contact the instructor as to the most appropriate procedures to follow. Contact Accessibility Resource Center at 277-3506 for additional information.
